

Wall~Eye 13'' & 46''

Mount the Wall~Eye at eye level on wall at congested corners. Allows on coming persons to prepare for traffic conflicts, perfect for a "T" intersection: Use an over the wall hanger to mount on office partitions, allows for wide angle viewing behind you.

Installation and Cleaning Instructions:

Wall~Eye mirrors are easily mounted by hanging the mirror from a nail or screw. Simply locate the mirror and mark the top edge nearest the center of the mirror lightly with a pencil. Measure down from this line approximately 1-3/8'' and mark a spot for the fastener. Insert a nail or screw (#10 or smaller) at this location leaving 1/4'' sticking out from the wall. Hang the mirror. Adjust the fastener as needed for a snug fit.

Cleaning:

Wall~Eye mirrors may be cleaned with a soft cloth dampened with water. Applying Pledge® Spray wax to the surface and wiping with a clean, soft cloth once or twice a year is recommended to reduce static and keep the mirror's high gloss finish. Scratches can be removed by applying Novus® Plastic Polish #2 or Turtle® Wax white polishing compound to the mirror.
