## Wall~Eye®

A new product specifically designed for the office environment that offers a wide field of view in a compact package.

Safety Security Products (Profile Plastics, Inc.) has developed a wide-angle oval mirror ideal for the office environment. Easy to hang on any wall, office partition, or cubicle, it provides a wide field of view from a close distance.

The mirror fits flush to the wall and is best mounted at eye level for clear sight lines behind or around obstructions to avoid collisions or surprises. It can also be used for safety in elevators or other close spaces.

Large enough to see what is going on and react accordingly, small and elegant enough to blend into existing décor.

The oval shaped mirror is 9" x 13" providing over 30 feet of view at a glance. Quickly and easily mounts on most wall surfaces with a nail, picture hanger, adhesive pad or cubicle wall hook.
