

CUSTOM AND STOCK TOTE BOXES

Thermoformed Material Handling Boxes Heavy Duty and Long Lasting

Save money, increase efficiency and speed production

TOTES

Features Benefits

Rugged, lightweight boxes. Designed for conveyor use, and plant handling of small parts.

Thermoformed with ribbed construction for extra strength and nesting lugs to prevent tight wedging when nested.

Rolled top rim all around provides maximum rigidity; recessed bottom corners give added strength and resist wear and abrasion.

Smooth contours afford greater protection to the contained product. No burrs, rivets, splinters, or sharp seams to scratch or otherwise damage the contents.

NESTING

Features Benefits To switch from nesting to stacking, turn box 180°

Durable, high impact strength, engineered for both nesting and/or stacking, specifically designed to prevent jamming when nested.

Designed to help you decrease maintenance cost; rolled top rim for maximum rigidity and sure handling; smooth interior is free of metal burrs which could damage contents

Highly resistant to acids, alkalies, oil grease solvents or temperature extremes; will not fracture, chip, peel or crack.

LIDS

Tote Box Snap-On Cover

Covers are available for the following Tote Boxes:

SP-10-5/8-8-5; SP-14-1/4-9-1/4; S-303; S-305;
S-306; S-308-14; S-311; and S-315.

These Snap-on Covers compliment our tote boxes—

They provide protection for stored articles and facilitate stacking.
